Mathematical Models for Surface Water Hydrology, edited by T. A. Ciriani (IBM Italy, Pisa Scientific Center), U. Maione (Hydraulics Institute of the University of Pavia, Italy), and J. R. Wallis (RES Yorktown Hts., NY), John Wiley & Sons, Inc., New York, 1977.

This book discusses the development and use of mathematical models of hydrologic process in the planning and management of water resource systems. It is based on the proceedings of a workshop held at the IBM Scientific Center, Pisa, Italy. The book is divided into parts that deal with synthetic hydrology models, flood models, and computer programs.
